

BOOT-0020 — Commercial Workflow Integration v.2

Milestone Date: 19 July 2026

Status: Planned

Objective

Integrate AnchorIntel into AnchorOS as the first complete operational intelligence application, demonstrating the end-to-end lifecycle from opportunity creation through Executive Opportunity Dossier generation.

This milestone represents the transition of AnchorOS from a platform of foundational services to a platform capable of executing a complete commercial workflow.

Architectural Impact

BOOT-0020 establishes the first production application built on AnchorOS.

AnchorOS Platform

Authentication	
Storage	
API Services	
Knowledge Engine	
Reporting Engine	
Administration	

AnchorIntel Application

This boot validates that AnchorOS can host independent commercial applications while providing shared platform services.

Success Criteria

The following workflow executes successfully without manual intervention.

Client

Create Opportunity

Opportunity Service

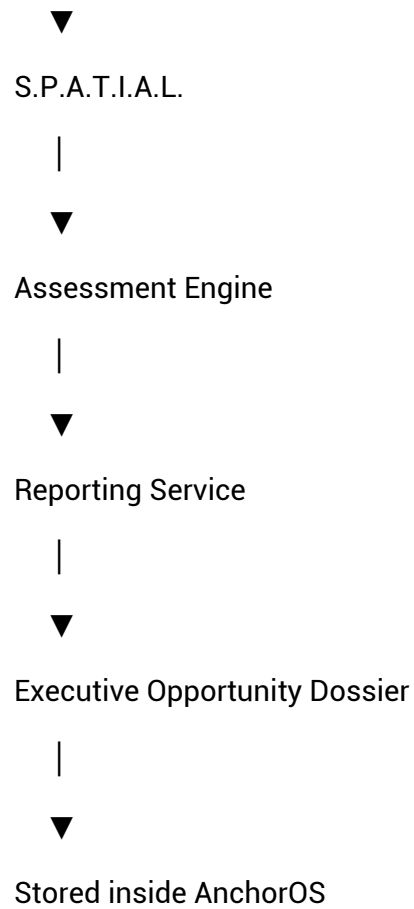

Evidence Service

Knowledge Module Engine

Completion of this workflow demonstrates that AnchorOS has evolved into a commercial application platform.

Deliverables

1. Opportunity Service

POST /opportunities

GET /opportunities/{id}

PUT /opportunities/{id}

Capabilities

Create opportunity

Retrieve opportunity

Update opportunity

2. Evidence Service

Capabilities

Attach evidence

Store evidence

Retrieve evidence

Confidence tracking

3. Knowledge Module Integration

Initial Module

AKM-GEO-FL-001

Capabilities

Load Knowledge Module

Execute Knowledge Evaluation

Return structured knowledge results

4. S.P.A.T.I.A.L. Assessment Engine

Verification

BOOT-0020 shall be considered complete when the following demonstration succeeds.

Create a new opportunity.

Attach evidence.

Execute AKM-GEO-FL-001.

Execute the S.P.A.T.I.A.L. assessment.

Generate an Executive Opportunity Dossier.

Persist all artifacts within AnchorOS.

Retrieve the completed assessment through the API.

Display the results through the AnchorIntel interface.

Platform Significance

BOOT-0020 marks the beginning of the Commercial Workflow Cycle.

AnchorOS is no longer solely a platform composed of infrastructure services.

It is now capable of hosting complete operational intelligence applications that deliver measurable customer value.

AnchorIntel becomes the first commercial application built upon the AnchorOS platform and establishes the architectural pattern for future products, including AnchorFiber and subsequent Sirius Logic Systems applications.
